

WORK COMMENCES BETHWAIN WELL

FABYAN PETE AT CLEANING
OUT; ONALTO TO
GET GOING

(By W. A. Knowles)

Mr. F. E. Stevens, of the drilling firm of Blair & Stevens, now has a crew working on Bethwain No. 2 getting equipment in order for the resumption of drilling on this location. Some difficulty is being experienced in re-securing the water supply necessary for rotary mud and boiler purposes and to overcome this considerable work has been required on the water well. It is expected that the rotary machine should be in motion within the next couple of days and that but a short time will be required to reach the production area from their present depth of 2175 feet with good prospects of bringing in another producer for the field.

R. E. Williams of Fabyan Petroleum, now has work under way on his No. 1 site at Fabyan and expects to have the drill stem run within a day or two when the work of cleaning out and deepening will be under way. The pipeline leading from Fabyan's No. 2 (formerly Imperial well) to Beaumont No. 2 well has been inspected and found in good shape for the early resumption of work on Beaumont No. 2 site which is on the opposite side of the Battle River from Fabyan's No. 2.

Mr. D. W. Beaulieu, Field Manager for Beaumont has been in the field and announces that their No. 1 producer will be placed on the pump right away and that it is the intention to renew work on No. 2 with rotary equipment that is at present in place and in shape for immediate renewal of operations on that site which has a present depth of 966 feet within a very short time.

John L. Daugherty of Onalto Oil Ltd. is expected back from Montreal within a day or two, when work will be resumed on this location from the 1925 foot level where a large flow of gas was encountered.

Mr. A. H. Stephenson, Field Manager for Peninsula Petroleum reports that considerable trouble has been encountered with quicksand and consequent broken casing shoes, necessitating some delays in getting new shoes in and handling casing on account of cave-ins but that, at their present level of 250 feet this trouble is being gradually overcome. With three shifts working on their modern Standard equipment it is expected that speedy work may be expected within a short time.

D. O. Credille, the veteran driller of the Wainwright Field is now back on the job after spending the winter months outside and is busily engaged in making arrangements for resumption of work on locations in the vicinity of his former site of operations in the Ribstone area.

It is reported that at least two new concerns will be in operation on this end of the Ribstone structure within a month.

An unnamed concern is announced to be shipping a fully equipped rotary equipment into this field for work North of here to be in operation by May 15th. It is also persistently rumored that the Shell people will have machinery in operation on some of their holdings near here in the early part of the summer, while Weyman equipment should be on-site at any time now.

No. 4 Wainwella is now on the pump again by Peninsula, and it is expected that some work will be under way on Wainwell's No. 2 guaser also within a short time.

Mr. Thos. Hawn who holds large oil acreage here, and who has been seriously interested in development work here for some years now has arrangements well advanced for an early program on some of this well-situated acreage.

The roads are now in good shape and trucks are hauling away large quantities of diesel fuel from other products from Associated Refinery. It is understood that Mr. J. W. Fraser, of Saskatoon-Wainwright and Associated has an ambitious program, well advanced for the Summer's operations of these concerns which includes a second well for Saskatoon-Wainwright, to be put down close to their present producer.

Easily operated by a musician with little practice, a machine for printing music known as the "scriptograph" has been placed on the market.

Doing some of the work of the old day a convenient supporting rack has been invented for the golf bag. The nickel-plated holder attaches to the bag rim and maintains it at a convenient angle for the player to reach any club.

CHURCHES CO-OPERATE FOR HOLY WEEK SERVICES

During Holy week (next week) special devotional services will be held by the United, Presbyterian and Anglican churches working together. The place and time of these services which are open to all, will be Monday evening, United church; Tuesday, Presbyterian church; Wednesday, Anglican church; each service will commence at 8 p.m. The fitting observance of the Easter season so rich in religious associations is being more widely practiced each year through the help of this co-operative effort.

MEMORIES OF A GLORIOUS VICTORY

Easter Monday morning of the 9th of April, 1917 broke grey and misty our advanced trenches were crowded with troops eager to break the suspense of waiting, by action.

Zero hour which was fixed for 5 a.m., could not be signalled from Corps H Q by any distinctive light or sound, but all watches had been synchronized over night, and on the dot of 5 a.m. it would be "over the top with the best of luck."

At half past four bombardment reached crescendo pitch, the air seemed alive with a million screaming demons and the sky to the East was lit up by many rockets and the ceaseless flashes of our bursting shells.

A noticeable pause in the drum-fire stressed the fact to those waiting thousands that zero hour had come at last and the battle was started to move forward, and with them ever Eastward, moved the battle.

We have all seen pictures of changing industry in which men are depicted clashing furiously forward, bayonets flashing, teeth clenched and picturesque blood-stained bandages encircling the heads of about every tenth man. This may have been true enough in bygone battles, but at Vimy in 1917 the clinging mud and gupping shell holes and tangled heaps of barbed wire made the going very slow and very yedate.

The first wave of light infantry moved forward slowly but expeditiously and behind that came a wave laden with machine guns, ammunition, rations and all the paraphernalia of war, stretcher bearers were already busy for no artillery preparation, no matter how prolonged and thorough can succeed in entirely destroying those cleverly concealed machine gun emplacements.

The moment the barrage lifted the German Machine gunners mounted their heavy guns and opened a murderous fire until out flanked and bayoneted in the ruins of their replacements. And thus on a wide front, and continued over a period of many days raged the battle of Vimy, an epic of achievement under untold misery and hardship to be crowned in the end by a glorious victory for the Canadian troops.

One is very prone to deplore appealing art to Canada of the flower of her young manhood but it must be remembered that at this time Canada as a nation was born.

Born of great sacrifice, and ever since conscious of the great place she is called upon to fill among the nations of the world, taking up the torch thrown to her by the heroic hands of her slaughtered sons, holding it aloft to lighten the dark corners of the world and the reaching out to that time.

"When the war drums throb no longer, and the battle flags are furled."

In the Parliament of men the Federation of the world"

Don't forget the Vimy Dance to be held on April 11th at the theatre. A good time is assured, to all.

EDGERTON HAS

SECOND FIRE SCARE
What might have had disastrous results at the Edgerton hotel at 3 a.m. on Sunday morning was happily averted by prompt attention when fire was discovered in the basement of the premises. From reports to hand it seems that the proprietor was awakened by smoke and upon going in to the basement discovered fire making quite a headway there. He immediately gave the alarm, and with in a very few moments a large number of townsmen had gathered and with the aid of the chemical fire engine the blaze was gotten under control, but before the fire had been nearly thrashed out the fire made its first floor. The cause of the fire is unknown as we are informed that there had been no fire in the furnace during the previous day. Some insurance is carried.

GOLF CLUB HOLDS ANNUAL MEETING

NEW OFFICERS PLAN TO IMPROVE COURSE AND REPAIR THE GREENS

The annual meeting of the Wainwright Golf club was held on Thursday evening last when over thirty members were in attendance. Reports were received from the retiring officials and a new slate for election was Mr. J. Telford installed as president for the ensuing year with Mr. G. Siddall as vice. Mr. F. Dicks was re-elected as secretary-treasurer while Mrs. G. Clark was placed in the position of convener of the ladies' committee.

The new membership committee consisting of Messrs. Dicks, K. Snyder and C. Wittmann has several new members in view, while Messrs. Siddall, G. Clark and F. Redgewell as the grounds committee have plans made to improve the course and to repair the greens immediately.

Several competitions are to be started at once and it is hoped to stage an open tournament shortly so, the members may look forward to a banner season for 1930. The executive committee are desirous of having the assistance of every member to further the interests of the club. The fees for the year were set at \$5.00 for married couple tickets and \$3.00 for single tickets.

At the close of the business, a pleasant time was spent with a little dance and refreshments.

FARMERS ADVISED SOW WHEAT NOW

SHOULD NOT AWAIT SPRING
RAINS, SAYS W. J. STEPHEN

Farmers should sow wheat at once and not await spring rains advice W. J. Stephen, who for eight years was field crops commissioner of Alberta and is a recognized authority.

Hundreds of prairie farmers have been puzzled over the present situation, lack of sub-soil moisture in many districts never being worn. Many have been cultivating the land the top eight or ten inches of which is dry and powdery and are delaying seeding until moisture arrives.

"If seeding is delayed until late what will run the danger of frost. In stead of plowing and harrowing away clear it should be cultivated now with a duck-foot cultivator or other implement and wheat sown on the deep side. The grain will then be ready to take advantage of the first moisture, otherwise if rains are late and heavy farmers might not get on to the land until too late for each crop."

"Unless moisture arrives it would not be advisable to do spring plowing in those dry areas. Of course sowing wheat in the abnormally dry soil is a gamble, but if seed is not entrusted to the soil, certainly there could be no crop. As to wheat acreage that should be sown that is a matter each farmer must settle for himself" concluded Mr. Stephen.

Mr. Stephen is now head of the agricultural department of the Chipman Chemical Company with offices in Edmonton, and has recently received hundreds of inquiries from farmers asking when to sow this season. From observations made across the prairie Mr. Stephen stated he would not be surprised if there is a 10 per cent reduction in wheat acreage provided moisture does not come very soon.

SCHOOL BILL GOES TO COMMISSION

HON. PERRIN BAKER ONLY MEMBER OF CAUCUS TO VOTE FOR MEASURE

EDMONTON—At the caucus of government members Tuesday Hon. Perrin Baker's much maligned measure was dealt with summarily. With the exception of Mr. Baker the conference was unanimous in turning thumbs down on the bill reports indicate it being understood that the government will not now the country about June 15 members expressed no desire to move or less handicap them selves with the controversial School Act.

Premier Brownlee or the minister of education, Mr. Baker announced to the house that the measure will be withdrawn and that a commission will be named to carry out further surveys of the educational situation with respect to the enlargement of school divisions as proposed under the bill before the house for the last few weeks.

IN MEMORIAM

In sad and loving memory of Audrey Emma Teeter, who passed away Easter morn, March 31st, 1929. When the Lord said "I have called you"

Come up higher Audrey, dear; You have won a crown in heaven By your love and kindness here We shall never forget our sorrow As we stand beside your bed, Or our deep and heartfelt anguish When we know that you were dead And the heartaches will cling. As the years go by,

As we struggle against life's tide; But the clouds will lift And brightness will come When they say by your side Mother, Father, Sister, Brothers, and Uncle Fred.

UTILITY COMMITTEE NOW DEALING WITH THE GAS FRANCHISE

COUNCIL INFORMED OF CAUSES OF TROUBLE IN CASES LIGHTING SERVICE

Minutes of a regular meeting of the Wainwright Town Council held in the Council Chamber last week when there were present: Mayor Foster and Councillors: Clayton, Huntingford, Pettie, Robinson and Welch.

Minutes of the last regular meeting were read and on motion adopted. A communication from Hon. Charles Stewart in reply to letter of the "Edgerton" in which the Council expressed its thanks for the use of Federal Building during the construction of the municipal building, and also its appreciation of the courtesy of the Supt. of the Buffalo National Park during that period stating that the Department was pleased to be able to render any assistance to the Town during that period. The above letter was acknowledged and filed.

A communication from Calgary Power Company as follows: March 28th, 1930 H. Y. Pawling, Esq. Wainwright, Alberta.

Consumers' Reports to Service Dear Sir: On receipt of your recent communication concerning the above, I immediately ordered an investigation by our local servicemen. Their report is now to hand, and the following is an extract therefrom:

Alberta Pool Elevator—complained of service. In this case it was found that the wrong wire was grounded not the neutral, as it should have been. Presbyterian Church—blowing fuses. Trouble was found in a socket. R. McKay—blowing fuses. Trouble was found in a cord to the motor on washing machine. Sawney Stores—A 110 volt motor was found connected to a 220 volt service.

J. L. Daugherty—complained of no lights. It was found that weather proof wire had been pulled into the entrance conduit. The installation had been damaged and the wire burned out.

Mr. Torrance—complained of meter registering at all times. A high resistance short circuit was found in a socket. When this was removed the meter was O.K.

W. Gray—complained that meter creeps. Trouble found on conduit inside of house; wrong lead ground. Mr. Gulickson—blowing fuses. Trouble found in socket. 1. Bissou—Residence—reported that radio goes on and off. Trouble was found in a double socket serving the radio.

From the above you will see that in no case was the Company responsible for the trouble complained of. We wish to assure you that we are very anxious to give you the best possible service, and shall be pleased to have all complaints investigated as soon as they are reported to us. I am sending a copy of this letter to Mr. D. Donaldson your wiring inspector, for his information.

Yours very truly CALGARY POWER CO., LTD. Manager, Northern Division

It was moved by Coun. Huntingford—that the letter from the Calgary Power Co. regarding checking of consumers' complaints be filed, but that in all future cases of this nature the person making such inspection after complaint, advise at least one member of the Committee affected—Carried.

A communication from the Mayor of Calgary, enclosing copy of resolution of Calgary Board of Trade, re: storage of water in Lake Minnetonka (Continued on page five)

RIGHT TO EXPORT GAS IS APPROVED

ALL PRIVILEGES AND RIGHTS UNDER JURISDICTION OF THE UTILITIES BOARD

EDMONTON—The right to export surplus gas from Southern Alberta fields to points outside the province has the approval of Premier Brownlee and his cabinet, but subject to the express conditions that such export shall not at any time jeopardize demands of domestic and industrial consumers within the province.

In the legislature, Wednesday afternoon, the premier read a statement in reply to recent questions by Jos. T. Shaw (Liberal), Bow Valley in which the stand of the government was outlined on the proposed export of Turner Valley Natural gas by a Southern Alberta company. Throughout, Mr. Brownlee emphasized the government's viewpoint that only gas which is now and at future times may be going to waste should be disposed of under the license.

George Webster (Liberal), Calgary asked again after the premier's statement had been read, whether cities and towns and other consumers of gas in the province would be protected against a diminution of supply and in event of an increased demand using the available surplus.

The applicants understood that only upon such conditions would a license be granted, Premier Brownlee replied.

LEGISLATURE CLOSED THURSDAY LAST

LIEUTENANT GOVERNOR GIVES ROYAL ASSENT TO 72 BILLS IN ALL

The fourth session of the sixth legislature of the province of Alberta was prorogued shortly before midnight Thursday by Lieutenant-governor William Egbert, his honor being escorted by his aides, Col. A. C. Gillespie and Capt. L. R. Matton.

It was probably the most unique prorogation in the history of the Alberta house, with an audience consisting mainly of newspaper men, page boys, telegraph men and officials. Owing to a threatened demonstration of the unemployed, the speaker had ordered all galleries of the house closed.

The session just concluded opened on January 30 and including the time spent in adjournment lasted eight weeks and one day.

In all, 87 bills were on the legislative order papers for the session of which 72 were given assent, and 15 were either withdrawn or died on the order paper. At the closing session last night the lieutenant-governor gave assent to 25 bills.

Among the important legislation assented to at the closing session were bills providing for transfer of the natural resources, for education of disabled or deceased soldiers, settlement of the contentious Edmonton half holiday question by giving the city the power to regulate clerks' hours under certain restriction set by the legislature, an act respecting mining in urban areas and revising of the mines act, and the security frauds prevention act.

Rice grass, long considered a worthless nuisance, is now being utilized as feed yearly to the infatigable and capable area of Holland.

DIVORCE BILL FINALLY GETS THROUGH HOUSE

MEASURE CONFERS ON ONT. COURTS JURISDICTION TO GRANT DIVORCES

OTTAWA—Considering the heart-burnings which the subject has caused and the impediment to business to which it gave rise, the conspicuous thing in the house was the passing in principle of the bill conferring on Ontario courts jurisdiction in divorce. It may even be considered the most interesting episode of the session so far. It paves the way for a revolution in the procedure where by people from Ontario will be able to apply for divorce.

There will be no change this year but by next year this jurisdiction will likely be conferred unless some obstacle is encountered in the meantime.

For general sports wear and for motorizing a crusher hat with a transparent brim now is on the market.

TEACHERS' CONVENTION CALGARY EASTER WEEK

The twentieth annual convention of the Alberta educational association which meets in Calgary Easter week offers the teachers and others interested in education an opportunity to hear an educationalist of outstanding ability and reputation, in Dr. Boyd H. Bode of Ohio state university, whose life work is the training of teachers. Dr. R. C. Wallace, the president of our own university, will be heard for the first time by Alberta teachers and the executive has arranged a discussion for Thursday morning by outstanding educationalists on the value of our educational objectives.

EDGERTON RESIDENT PASSES AWAY FRIDAY

There passed away on Friday last at Edgerton, one who will long be remembered for her good deeds and loving disposition, in the person of Miss Eliza Montgomery, at the age of 62 years, cancer being the cause of death.

The deceased lady, who was born in Gorrie, Ont., came to Edgerton some eleven years ago, and took up residence with her sister Mrs. McEwen later going to live with her sister Mrs. Alfred Challenger.

Some three years ago she went to live with Mrs. Joshua Challenger who through advanced age has been in failing health, and was a faithful attendant upon that lady until her own death. Although she had been a great sufferer from cancer during the past year her cheerful disposition gave no indication of her knowledge of the closeness of her death.

She leaves to mourn a sister Mrs. McEwen of Edgerton and a brother Mr. Joseph Montgomery, at Wolfe Point, Montana, as well as a niece (Mrs. A. Challenger) and nephew (Mr. Harold Sparks) both of Edgerton.

THE FUNERAL
Which took place at the home of Mr. Challenger at Edgerton on Sunday last, was possibly the largest attended the village has ever witnessed and the Rev. G. King (who was well acquainted with the deceased) spoke touching upon life which the Lord had ordered all galleries of the house closed.

Favorite hymns of the deceased "Rock of Ages", "Safe in the arms of Jesus" and "Lead kindly light" were sung by the congregation which filled the church to overflowing, and which came from the whole country side to pay their last respects to one who in life was beloved by all.

Interment was made at Edgerton cemetery, the pallbearers being: Messrs. F. Vanstone, T. Baskley, D. Buchanan, J. Challenger, R. Hill and T. Sandelhurst, the arrangements being carried out by McLeod's parlors of Wainwright.

Among the floral tributes were: Mrs. McEwen, pillow; Alf and Ellen, wreath; Harold and Mabel, wreath; Mr. and Mrs. W. W. Wainwright, wreath; Mr. and Mrs. G. King, wreath; Ladies of Bloomington Valley, wreath; Jean, spray; Dorothy, spray; Brother Joe, spray; Mr. and Mrs. Shannon (Kenora, Ont.), spray; Mr. and Mrs. John Challenger, spray; United Church L.A., spray; Mr. and Mrs. W. Challenger, spray; Edgerton W.I., and others.

Sowing grass seed from an airplane has been found to be the most economical method of converting logged-off lands of Western Oregon into pastures.

Marble slabs are being sawed from a hillside in the Ozarks with a quarter-inch three-stranded steel wire 1,400 feet long, driven by an old auto mobile engine.

TRANSFER NATURAL RES. WILL NOT AFFECT GRAZING

The transfer of the natural resources to the province will not affect the regulations regarding grazing leases, and ranchers need not fear that their rights in this connection will be infringed. Hon. George Hoadley minister of agriculture, told members of the Western Live Stock Growers' Association at their annual meeting. The minister reviewed the negotiations leading up to the transfer of the resources by the Dominion government, emphasizing the nature of the agreement the Alberta government had been able to secure, and pointing out that the controversial school lands question had been settled to the satisfaction of both parties concerned.

C.N.R. HAS HEAVY PROGRAM FOR WEST

PLANS TO SPEND \$25,000,000 ON MAINTENANCE & CONSTRUCTION FOR 1930

WINNIPEG—The Canadian National Railways will spend \$25,000,000 on new construction maintenance and general betterment work in Western Canada this year, according to a statement issued today by A. E. Farn, vice-president of the Western Region of the company. This figure is inclusive of the sums which will be spent on the Hudson Bay Railway and it does not include the Canadian National's share of the budget for the Northern Alberta Railways. As has already been announced, \$9,000,000 will be used in the branch line building programme. This work constitutes this year's portion of the three year programme approved by the Federal Parliament in 1926 and most of the lines are located in Saskatchewan and Alberta. The lines being built in British Columbia. Altogether 12 branch lines are included in this year's western programme.

The balance of the money will be used on lines in the west, now in operation and on the two hotels which are under construction in Vancouver and Saskatoon. Rebuilding of steel, track maintenance and improvements, ballasting, truck extensions, bridging, fencing, the erection of new buildings, water supplies and railroad facilities generally comprise the bulk of the work for which provision has been made. It is not possible at this time to particularize the various items in the budget since each item requiring a capital outlay has to be sanctioned by parliament before work can be commenced.

It can be said, however, that among other things, the company proposes to replace 270 miles of 80 and 85-pound steel with new 100-pound steel and to relay 109 miles of light track with 80 and 85-pound steel. In the programme for further strengthening track structure, the installation of some 2,725,000 ties and 690,000 rail anchors is contemplated. Between 3 1/2 and 4 million ties will be replaced, of this number about 15 per cent will be treated ties. A considerable amount of ballasting is also proposed.

The extension of forty passing tracks on trunk lines is proposed. This increased capacity will permit a more economical use of power. Provision is made for the construction of through sidings at 31 points in addition to existing passing tracks there by releasing the working of the entire line to train operation and so providing an avenue for a further speeding up of passenger and freight train schedules. Twelve loading track extensions are also projected. Yard extension, improvement and rearrangement has been provided for at a number of points, the most important of which is Saskatoon where the extensive terminal changes which were begun last year will be proceeded with.

Together with the branch line programme already mentioned, the proposed work constitutes a heavy programme for the engineering forces of the company. The branch line programme also calls for the grading of 159 miles of line; tracklaying on 155 miles; ballasting on 217 miles; the erection of 300 miles of fencing; 240 miles of telegraph line; 20 station buildings; 40 sections of dwellings and 10 water structures including tanks and pump houses.

The programme on the Hudson Bay Railway which is being supervised by the engineering department of the Canadian National Railways for the government is also extensive. Between the Pas and Mile 336, the original portion of the railway, a number of station buildings and employees dwellings have to be built and a certain amount of filling of embankments has to be undertaken.

It is expected that the progress to be made during this year on the various works will be sufficient to complete and equip the Hudson Bay Railway to a point which will permit of commercial business being extended beyond Mile 356 to Churchill. This however, will depend to a considerable extent upon how early weather conditions will allow work to be resumed.

Conveniently attached to the control wheel of the airplane where it is in plain sight of the pilot a real map has been placed on the market in Germany.

For target shooting with a shotgun a hand-operated trap now is on the market. The trap has a strong fitting around the wrist and a slot in which the day target is placed before it is fired.

Why Corona is the CHAMPION PORTABLE of the World

CORONA is the World's Champion Portable on the following 8 exclusive points:

Strength: Corona has a rigid one-piece solid aluminum frame.

Simplicity: Fewer parts than any other standard keyboard typewriter.

Completeness: More big-machine features than any other portable typewriter.

Easy to Learn: Corona design is the result of 20 years' study of the needs of beginners.

War Service: An unequalled record for durability as the official portable of the Allied Armies.

Popularity: As many Coronas have been sold as all other portables combined.

Durability: Coronas purchased 20 years ago are still giving satisfactory service.

Beauty: Graceful in line, exquisitely finished in every detail.

Drop in on our store today and see Corona. The minute you lay eyes on it you will realize why a million people use it—why so many business men, novelists, newspaper men, and students in schools and colleges prefer Corona to any other portable.

Come in and try Corona with your own hands. See how speedy it is—how smoothly it operates. If you can't come to the store, simply telephone us and a Corona will be sent to your home or office for examination. There is no obligation.

Money Isn't Everything

BY SARAH ADDINGTON

The front hall door opened Hugh's step sounded, the children flew down and Margery upstairs thought and deny.

"Something's happened!" For in the way Hugh laughed the very way he had flung open the door there was a vibrant excitement a little sure wave of it that had travelled clear up the stairs and into Margery Hugh was coming up Jim and Nancy beside him Johnnie in his arms.

"Well!" "Hello!" His voice was queer and high. "Nancy gateway for an of, dear Nancy aged four was wound rather dangerously about his right leg. Listen kids all bets are off for a while!" He set Johnnie down and Hugh gently forward toward the nursery. "Just it!" he commanded. "All of you go into the nursery get undressed and see who can get into bed first and then we'll have the big romp see?"

"Johnnie can't!" Began Margery. "Of course he can!" said Hugh. "If he could take off all his clothes when the minister's wife was here he can certainly do it again now. Now run along I want to talk to your mother and you're too distracting."

Johnnie was trying to leave him set up to his father's back. "Play bear!" he commanded.

Hugh reached back and seized the part of Johnnie that his hand came to it happened to be Johnnie's romper leg—and fetched him around.

"Shoo!" said Hugh. "Get in there!" "Father!" shrieked Nancy we sang in school today and I sang the loud!

est! Her eyes blazed at this glorious feat; her cheeks were pink with pride. "Did you Nance?" said Hugh. "Great will you sing for me later."

"I sing now! It's a song about de little frog and de big frog and—"

Hugh nodded understandingly. "All right! Don't forget now you're going to sing to me about the frog. But now—"

Johnnie was on his way downstairs. "Jim go get Johnnie and take him to the nursery. Oh!" wailed Hugh helplessly then "do something with them Margery!"

Margery laughed and went around scooping up children finally had them all in their room with the door shut. "Through how long Johnnie will back—"

she said cynically. "They were in their own room now more or less safe from their various little pitchers Hugh's eyes shining oddly I've got a new job."

"Hugh!" He was nodding foolishly grinning. "Well go on!"

"Well old Caulfield called me up to-day—"

"The investment banker sent?" "Yes. He asked me over to his office and I went—"

"Oh why does Hugh always have to go clear around the barn?" thought Margery, agonized—

"thinking it was another something or other he wanted done, and he offered me a membership in the firm with fifteen thousand a year to start and a five per cent interest."

Margery felt back in her chair and then sat up and said, "No!"

"Yes. Honest. No funny business. No catch. Fifteen thousand and five per cent and junior membership. Can you

beat it?"

"I can't," said Margery. "Oh, Hugh you took it didn't you?"

"Well, I said I would talk it over with you."

"Oh Hugh call him up," begged Margery. "He may change his mind!"

Hugh grinned. "I guess not. I told him I'd let him know tomorrow. He wants me to start in the first of July."

"When?" Margery was still gaping. "Hugh, how much is fifteen thousand a year a month?"

"One thousand two hundred and fifty."

"And how much will your interest be?"

"Oh, I don't know. They make at least half a million a year. They're a small house. I suppose I would get \$25,000 a year on profits."

"Then we're rich!" cried Margery. "Well," said Hugh, "we're richer than we were, a whole lot. But I suppose we oughtn't to count on the percentage, we can count on the salary though."

A shriek sounded from the nursery their door opened violently.

"Mother," said Jimmy. "Johnnie won't let me take off his shoes. He says his feet are cold; he wants to sleep in his shoes."

Margery went hastily into the nursery. "Come on Johnnie, she said. Shoes off. No money business."

But she was thinking: "It wouldn't matter if he did sleep in them. It wouldn't matter if he slept in all his clothes. We're rich. We're going to be gay and happy and free now for the rest of our lives!"

The children were finally quiet for the night. Baths and stories and romps and Nancy's aria were achieved. Hugs and prayers and good nights were done with.

It was half past seven and Margery said as she said every night. "It's to late and it's too hectic. Johnnie ought to be asleep by seven. And you ought to have your dinner earlier."

But they lived in a suburb and Hugh worked late and Margery's firm opinion was that fathers and children ought to have more than the hasty breakfast hour together.

"But I don't see," said Margery, at dinner—lamb stew and stringbeans and Margery's apricot whip, whose spiky garland of ladyfingers always made Hugh laugh for some strange husbandly reason—"I don't see why he suddenly jumped this at you. Had he ever hinted at it before?"

"Yes," said Hugh, "he had. He's been hinting all spring. You see, he liked that job I did for him on the cement merger. You see, that quiet sold me, Margery. He said a lot of nice things and said he wanted some body in the firm that could do that sort of set-up for them."

Margery had always known Hugh was a genius at figures. She knew it by the fine frenzy he had always had for mathematics, by the long nights he worked at home when he really didn't have to, by his fervor for charts and diagrams, by his real flair for making figures talk by that sudden change they made six years ago. Hugh was an accountant. Once he had been a lawyer, the law for Hugh left something that was to be desired, and after they had been married three years and Jimmie

Dominion of Canada Income Tax Returns DUE APRIL 30th

ACT PROMPTLY—

Accept the help offered
by Income Tax Inspectors
and Avoid Penalties

Every person who during the year 1929 had an income, from any source, of as much as \$1,500, if single, or \$3,000 if married or supporting a family, is required to make an income tax return.

If you are situated as above described, failure to make this return by midnight, April 30th, together with cheque or cash for at least 25% of amount of tax, will render you liable to a penalty equal to 5% of the total tax payable. (Limit of penalty \$500.)

To avoid incurring this penalty, obtain NOW, from your postmaster, or from the Inspector of Income Tax in your district, the necessary forms and make your returns at once. These forms are as follows:

- Form T1** For Individuals other than Farmers and Ranchers.
- Form T1A** For Farmers and Ranchers only.
- Form T2** For Corporations and Joint Stock Companies.

Each form contains in itself instructions for filling out.

By making your return by April 30th you gain in two ways:

- First**, you avoid penalties for delay.
- Second**, you qualify yourself for the privilege of paying in instalments.

INCOME TAX INSPECTOR WILL HELP YOU
MAKE OUT YOUR RETURNS

If there is anything in the income tax return which you do not understand, any Income Tax Inspector will be glad to explain what is required.

was just six months old they made a great and terrifying decision. Hugh was to study accounting at night—every night except Saturday and Sunday. It would take three years, and the initial salary in accountancy would be minute, but Hugh wanted to be an accountant, and that was enough for Margery, and he thought he could succeed in it, and that was enough to give Hugh courage for the awesome venture. For those three years, Hugh had struggled with the law by day and leaped ahead with accountancy at night. Nancy had been born and Margery had done housework at home and part-time work in the little library at Woodcrest. Finally Hugh left the law office, was blessed to get a berth in the largest accounting house in New York and three more years had gone by. Lean years, hard years. Johnnie had come. Not enough money. Not enough fun. Too much work.

And now, like a miracle, all this was behind them. They were rich! If old Caulfield had offered Hugh a million dollars a year, they couldn't have felt richer.

July first came. Hugh had resigned; had said rather sentimental farewells to the firm of Wilcox & Gordon especially to a certain red-haired freckled Miss Twitney in the stenographic department, and to Mr. Wilcox the senior member, who was in everything, professional and other wise. Hugh's mentor and model man. He found at Caulfield & Company a big office reserved for him and him alone. He had a secretary, a gorgeous Miss Engel, but he yearned for Miss Twitney and secretly resolved to get her. He found himself sitting in con-

(Continued on page 3)

BON-TONE

HEALTHY VIGOR—is the natural result of a perfectly functioning body; where all the organs are acting regularly. When you suffer with headaches and pains you can trace the source to a breakdown in the system of either your kidneys, liver, intestines or stomach. Usually they are clogged with dis-ease-forming refuse that is sending poisons through your system. Bon-Tone, composed of the time-tested beneficial extracts of fourteen herbs, roots, barks, and berries, will not only cleanse your system thoroughly but will also tone it up. Get a bottle today and notice the wonderful results of its use. Price \$1.25 (3 for \$3.00). BONE-TONE is For Sale At All Good Druggists Everywhere. Or Write To W.A. For

Wainwright Merchants Only

Being one of a series of chats with Wainwright businessmen in which they are told how to increase their volume of sales.

There's money in Wainwright. There are people here aptly to spend it. There's good business for you—if you, the merchants of Wainwright, join The Star in keeping Wainwright's business in Wainwright.

It all boils down to the very important thought that the nearby, bigger towns and the mail order houses are ALWAYS trying to attract trade from the smaller communities.

Always trying! Very often succeeding! And, sad but all too true, to the detriment of you, the merchants of Wainwright and the merchants of all other small towns.

What to do about it is a problem you must help solve, if you are to prosper. A mighty vital problem it is, too, as you well know.

Just the same we can keep Wainwright's money in Wainwright. And the folk of Wainwright can be brought around to the habit of buying in Wainwright almost exclusively. And you can make both conditions possible.

The manufacturer's advertising in Wainwright's home newspaper will help you sell more of your merchandise to more and to the greatest number of Wainwright's people.

This advertising support will keep Wainwright's money in Wainwright. It will mean good business for you—and more of it.

This newspaper has joined with the town newspapers all over the country in a nation-wide campaign to convince national advertisers that they can best assist small town merchants by advertising in the local, home town newspapers of the small town merchants.

YOU NEED THE ADVERTISING AID OF THE MANUFACTURERS WHOSE GOODS YOU STOCK—URGE THEIR SALESMEN TO RECOMMEND YOUR LOCAL HOME NEWSPAPER.

THE WAINWRIGHT STAR

Money Isn't Everything

(Continued from page two)

ference with Mr. Caulfield, Mr. Black and Mr. Martin, talking over million dollar considerations and mergers. He was now today, July first, a full-fledged investment banker. It thrilled him to the very marrow. His work fascinated him. His hours were short. The money came in at the end of July. Unbelievably that check did call for one thousand two hundred and fifty dollars, in spite of his tremors of fear that it had all been a madman's dream.

One day in July he said to Margery "Look here Caulfield wants up to go down to Spring Harbor for the rest of the summer. He has a little house on his place and we can have it cheap."

"Oh," said Margery. She was thinking of the beach for the children of the fun of getting away from their own hot little box. But Spring Harbor's so far. It's over an hour down there, isn't it?"

"Yes. But he wants me to ride in the club car with him. It wouldn't be bad."

But he looked sheepish. That club car was famous for its million-and-billions.

Margery laughed. "Oh, all right. That would be fine if you don't mind the trip. But why does he want us? Just trying to be nice?"

"I suppose so. And I suppose he wants to shoot a little golf. I told him I had hardly played three games since I was a caddy."

So the next week they moved the children, the trunks, the crib, the toys to the enchanting little cottage on Mr. Caulfield's estate, which he gave them for nearly nothing a month Margery took Hettie, the little maid with her, and they had to buy a car, because the estate was four miles from the station. Mr. Caulfield offered to pick Hugh up every morning and take him home every night, but Margery said it sounded like a school bus and that they'd get a second-hand car.

Mr. Caulfield was horrified at a second-hand car.

"But what's he got to do with it?" asked Margery.

"Nothing. Except that he has made this possible and we can get a better car."

"But Hugh, we can't. We've just started. I think it's silly to bust out with an expensive car, just for two months when we haven't got anything else, when I need new sheets like the very dickens."

"So do I, said Hugh suddenly. They got the second-hand car. Hugh was about to order a suit. He hadn't got around to it yet. He brought home samples and he and

Margery pinched them and admired them and could not decide between a gray flannel which was ideal for summer, and his cheviot which was pretty good all the year around.

Caulfield wants me to go to Pell and get some really decent clothes," said Hugh. "He says it pays."

"Who's Pell?"

"Oh, a pretty swank tailor. His suits cost \$150. I think Caulfield's right. Cheap suits don't wear."

"Well, I think Mr. Caulfield's got a nerve telling you to go to the most expensive tailor in town. Not that I wouldn't love you to have the clothes. Only we're not ready for that sort of thing are we? And can't you get a good suit for seventy or eighty dollars?"

Hugh had never paid more than sixty before.

"Yes I can," said Hugh. "Only I can't look like a hick down there. And I thought maybe the few extra dollars would be worth while."

"Go to Pell's," said Margery, "and get two. Heaven help me if I ever keep my husband from looking right the first chance he ever gets in his life."

But the paternalistic Mr. Caulfield did rather irk her. She had met him—she and Hugh had dined in the big Georgian, stone edifice on the hill—and Mr. Caulfield had turned out to be a nice, cozy, twinkly, white-whiskered old gentleman, and Mrs. Caulfield a nice, well-bred, decorous, angular lady. But who was Mr. Caulfield to tell Hugh what kind of a car to buy, what kind of clothes?

August went by, cool and sweet, full of bathing for Margery and Hugh and the children on the Caulfield beach, of lounging and reading for Margery, of plans for the coming winter. They had the Caulfield's for dinner and it was pleasant enough. Natalie and Lucien Garfield came from Woodcrest for the week end. Margery's sister came for a week.

But Sundays were rather disappointing. At nine o'clock, Mr. Caulfield's car stopped at the cottage. Hugh climbed in and was gone. At one, Margery with her female guest if she had one went to the club where they all lunched together, the golfers and their ladies. At two, Hugh and Mr. Caulfield, and whoever happened to be playing with them, strolled back to the golf course and the ladies went home again. Mrs. Caulfield to the big house and Margery to her cottage. Sunday evenings Hugh was so tired and sleepy that he sat around grunting for a while and then went to bed. But he was home and happy and Margery said nothing. Only their old Sundays in Woodcrest, boy and crowded as they were had been more so for him. Their picnics and walks and games with the children and reading and poking around the garden.

September came along, glorious and mellow. It was time to be thinking of fall plans, high time. They had given up their Woodcrest lease. They had to move now, whether they wanted to or not.

Margery took the long jump up to Woodcrest, couldn't find a house and came back with a new scheme. "Hugh, I'd love to live in town for a while. Would it be awful for the children?"

"I don't think so," said Hugh. "Proximity of them, aren't there? We could live near a park. Let's try it. It would be almost not to have to live by train."

They found an apartment with six rooms and two baths for \$3,000. The first Saturday they were in the apartment, Hugh said:

"Mr. Caulfield wants us to come down for the day tomorrow."

"Oh, Hugh, can we?"

Margery looked around at the unpacked trunks, the rolled-up bags, the piles of china, then caught the shadow of disappointment on Hugh's face and spoke quickly:

"You go, Hugh. I haven't anybody to leave the children with anyway. I'll stay home and putter and you can help when you come home if you are not too tired."

"Oh come on, said Hugh. 'We won't have so many more good Sundays. Telephone Hettie.'"

In the end they both went. Margery was strangely resentful. Hugh and his golf. Hugh and his Mr. Caulfield. They leaving home and children in a perfect whirlwind of disorder to take this wretched little train for Hugh's golf game. Then she reproached herself. Hugh had so little easy carefree, fun. What was there to be cranky about? An October day a long, idle Sunday in the country. She beat up and set herself to the enjoyment of the blue and gold beauty-around her.

By November they had settled down thoroughly into their new life. The apartment was all that Margery had ever dreamed of. After some half-dozen tries, she found Opal, a colored woman who cooked perfectly, who liked children, and who appeared every morning on the tick of half-past seven.

The children liked their new school. Johnnie found the park a happy hunting ground entire to his liking. In the morning he went with Margery, in the afternoon with Opal.

Hugh got home early of evening, looking fit and jolly. His new job the new way of living, his new clothes, changed the Hugh of Woodcrest

to a new happy being who made Margery's heart sing with joy.

"It's the freedom that a little bit of money gives you," she said to Hugh one night. "Don't tell me that poverty doesn't cramp your style."

"She was remembering the other years the dingy little house, the bills that appalled them every month no matter how small they were, the breathless fear of doctor's dentist's fees, cheap food, the too-worn clothes, the makeshifts and compromises and dodges they had made in the department of living."

"Isn't that the way you feel, Hugh? That you are free now where before you were bound and tied?"

"Yes something like that," said Hugh. "I feel comfortable mind you. I can't rest on my oars, I've got to make good down there. But I don't feel as dazed—dazed and bound as I did. If I want to buy a dollar's worth of sweet peas for you I don't have to sweat and bleed about it. If I need a new pair of shoes, I can buy them and forget it. I know the kids are being properly taken care of, and that you don't have to walk in the rain because you haven't got a taxi fare, and that you can order chicken if you want to instead of—well whatever it is you order that is cheaper than chicken. That's what I mean. That's that it sizes up for me."

"Well," said Margery, "that's freedom. And that is what I mean by it."

In early December Mr. and Mrs. Caulfield came in town for their annual three months at a hotel.

"We must ask them to dinner," said Hugh.

But Margery sighed to herself. As a patron, a fellow firm member, Mr. Caulfield was good and desirable, as a dinner guest he was rather tiresome. His wife was worse, a worthy, conventional woman, steeped in wealth, still the woman, the person had vanished. They gave the dinner Mr. Caulfield was obviously and proudly pleased with the establishment of his young protégé and his wife, and Margery at these signs breathed with relief and then was furious with herself. What difference did it make whether Mr. Caulfield approved of Hugh's home or not? It was Hugh's home now. She and Hugh did not have to live to suit Mr. Caulfield, and she was unreasonably glad when Johnnie came howling into the dining-room in his nightgown. Well it was nice for Hugh to have his senior member approved and pleased. Who was she, Margery, to carp at their happy state and the man that had made the state possible.

In a few days Hugh came home and said there was a customer they had to entertain.

"Caulfield doesn't like to do the night stuff," he explained. "So we're elected. Dinner here, theatre and night club on the firm."

The customer had a wife it seemed and a friend who also had a wife and Mr. Blake another member of the firm, and Mrs. Blake were included to.

The customer was broad of shoulder and gold of tooth, his friend was thin, and their wives were dowdy, pathetic dears, and the whole party was devastating and demoralizing.

This was not the last of such professional duties. Margery found that one one has to entertain the visiting firemen, and that in the firm of Caulfield and Company she and Hugh were expected to do the lion's share. Mr. and Mrs. Blake took a small part of the burden but Hugh, because he was young and affable and easy with all kinds of people was considered the ideal host for the firm. Indeed, Mr. Caulfield opined that the young Rodgeres must be having a jolly winter, going to theatres, dancing at the night clubs, at the expense of the office.

In the investment banking business (Continued Next Week)

THE AROMA OF THE SOIL

"Smells are surer than sounds or sights to make your heartstrings crack," wrote Kipling and those who have already gotten the first gust of Spring air as it flowed over the lap of Mother Earth, realize how truly he spoke.

There is something about the aroma of the soil that gets under the skin of the city born. The turning of a few spadefuls of earth has made gardeners of those who have never before dreamed of a garden.

And what enthusiastic gardeners they become. To them the growth of a tiny seed is a marvel. Familiarity has not bred the contempt that it oftentimes breeds in the man who has toiled in the garden all his life.

They seek out the bits of soil around their homes, learn to cultivate it, revel in the fresh vegetables they produce with so little effort, and almost instantaneously have joined that immense army of town and city gardeners, who each year purchase their seeds and seek to better their achievements of years that have gone.

Try gardening your own tiny plot of ground. Try it once and you too will be an incurable, for there is something in the aroma of the soil that seeps into one's very fibre.

For the motorist who smokes a vest pocket ash tray is on the market.

REPAIRS

ARE WHAT YOU SHOULD BE WORKING ON NOW!

There is no doubt that you will find lots of little things around your machinery which are in need of fixing and such that we have the best Smith in town drop these in to us and we will put things to rights.

No matter what machine it is; or what is the matter with it, we can make it as good as new so far as productive results are concerned.

SPRING SONG

The "winter of our discontent" (as old Bill Shakespeare once said) is over and we now welcome another spring—changeable and provoking though it so often proves. It can well be dubbed the season of contrasts. It is the time of bubbling youth, joy and merriment. It is also associated with coughs and chills, sulphur and molasses, fertilizers, seed catalogues and "ackers rumpling" in the creeks. The air is filled with the sweet and clean smell of leaves and green grass, of blossoms and birds of growing things, also with the de-
mands of our wives and daughters for new rainment. The old-time hand-organ grinder with his hand-organ is seen on the streets, and the rumble of the ice wagon is sup-
planted the creek of the mail cart. The railway may have burned the dead grass along the railway tracks in the country, and the town-dweller has spaded up his back-yard garden. It is the time of fond hopes, of beautiful dreams of love. It also rains like the dickens at times. The wild strawberry will soon be blossoming on the warm hillside and the white hawthorn spreading its sweet fragrance in the fields beyond. Down in the swamps, Mr. and Mrs. Mosquito just newly married have commenced an intensive production campaign and millions of their dirty pesky little offspring will soon be tormenting the lives and legs of those who "dwell near nature's heart". It is a season of strong extremes—of hot days and chilly nights—of bright sun and shine and spring showers—or early snowdrifts and occasional snow-
storms—the winged liquid melodies of the song birds and the raucous cries of the crows and grackles. It is about the meanest, dirtiest and most uncertain time of the year but, darn it peckay—like we like it because of its promise for more glorious days to come.—Ex.

MOTHER LOVE

By Rev. A. B. Rhinow

A mother was dying in the hospi-
tal. She suffered agony, and her mind was no longer clear. In the shadows around her bed the family sat silently. They did not say a word, because they did not want to disturb the patient, and because their feelings were beyond words.
Suddenly one of the sons coughed. We hardly noticed it, but it did not escape the mother.
"Was that you coughing, Fred?" she said with tender solicitude.
"Yes, mother," he answered, "but never mind, it's nothing."
In spite of pain and the shadows of the valley of death, mother's love asserted itself.
How beautiful is mother's love. It is the sacrificial love; it always gives. A mother cannot be happy as long as she knows that one of her children is unhappy and she finds her happiness in making her loved ones happy. She spends herself on her children, and considers the sacrifices a precious privilege.
We all ought to get down on our knees and thank God that in this pilgrimage through life we were permitted to taste so sweet a thing as mother's love. And as we adore, we shall be able to see through the heart of mother into the great heart of God.

INFORMATION ON TREATING
SEED POTATOES

The aim of all potato growers is to produce the biggest and best crop at the lowest possible price. This highly desirable condition is dependent upon the number of factors such as good soil, quality of seed spraying

and cultivation. However, while the importance of these features is unquestioned, very often the prospect of a good crop is ruined through neglect to practise seed treatment which is aimed to reduce the enormous losses and inconveniences caused by scab, black leg and rhizoctonia; all of which occur in every province in Canada. Failure to treat for these diseases may result in soil contamination, poor stands, weak plants and a diseased crop. Where time and labour are the main objections to treating seed potatoes, products known as organic mercury compounds are now available. They are used as dips and the manufacturers recommend the use of the "mild" products. Besides destroying the disease producing germs, organic mercury compounds have the added value of protecting seed-pieces from destructive rot which are largely responsible for poor stands, particularly when the early season is not favourable to the growth of young roots which establish the potato plant.

While the foregoing method has its merits, corrosive sublimate (bi-chloride of mercury) remains the standard disinfectant for seed potatoes. In-
vestigations conducted by the Division of Botany, Experimental Farm, Ottawa, have demonstrated the efficiency of this method when the directions are followed carefully.

The bi-chloride treatment constitutes soaking seed potatoes for 3½ hours in a solution composed of 4 ounces of bi-chloride of mercury in 25 gallons of water. After each lot of four bushels has been soaked, ½ ounce of bi-chloride is dissolved in 1 quart of hot water, and added to the original solution and water added to replace any loss. This is necessary to maintain the strength of the solution. In the past it has been customary to treat as many as eight lots, adding an extra ½ ounce of bi-chloride after each soak. It has been demonstrated that the solution has no killing effect if used eight times, and even where the necessary precautions have been observed it is advisable to discard the solution when four lots of potatoes have been treated. Certain precautions will aid in preventing deterioration and render seed treatment more valuable. These are as follows:—

(1) Dissolve the bi-chloride in not less than one gallon of boiling hot water.

(2) Wash the potatoes before treatment to remove dirt. (This is very important.)

(3) Have two clean cans with drain plugs at the bottom. When one soak is complete drain the solution into the second can and clean the seed out of the first. Use these cans alternately throughout the treatment.

(4) Dissolve all bi-chloride in boiling water.

(5) When 12 to 16 bushels of potatoes have been treated make up a new solution.

(6) Do not treat in bags.

(7) If possible use rain water, or water known to be soft.

(8) After treating put seed in clean place to dry quickly.

(9) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(10) Do not treat in bags.

(11) If possible use rain water, or water known to be soft.

(12) After treating put seed in clean place to dry quickly.

(13) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(14) Do not treat in bags.

(15) If possible use rain water, or water known to be soft.

(16) After treating put seed in clean place to dry quickly.

(17) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(18) Do not treat in bags.

(19) If possible use rain water, or water known to be soft.

(20) After treating put seed in clean place to dry quickly.

(21) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(22) Do not treat in bags.

THE DRY LAND GARDEN

No farm home is complete without a garden, but there are some parts of Canada where growing a garden is difficult, and it is in these places where gardens are really most needed.

Gardening is particularly difficult in the "dry land" areas of Southern Alberta, and some large sections in Saskatchewan. But with adequate preparation even dry land can produce a garden which will add much to the pleasure of living on a prairie farm.

The Lethbridge Experimental Station of the Dominion Department of Agriculture has devoted considerable attention to the problem of the dry land garden with interesting and helpful results.

The first essential to a good dry land garden is the Lethbridge Station finds is summer-fallow. The grain farmer realizes the value of summer fallow to his field crop, but he has been slow to appreciate its value to the garden. The carry-over of water in the sub-soil is important, particularly in the dry season, to the garden. For this reason garden vegetables do better on summer-fallow than they do on ground in which vegetables are grown the preceding season. It is found to be good practice to summer-fallow at least one-half the garden area each year.

Garden produce require manure, but the results obtained from this depend largely upon the time at which it is applied and on the extent to which it becomes absorbed in the soil. The practice of applying manure on non-irrigated land the same year that a crop is to be grown usually proves disastrous, and this is for the reason that it has no chance to become incorporated in the soil.

Manure should be applied in the winter or early spring before the ploughing for the fallow is done. Not only does this give it a chance to be incorporated in the soil but it also increases the ability of the soil to hold moisture and improve its tilth.

A good windbreak will add much to the success of a garden in the dry land areas. It not only helps to hold the snow during winter but it protects the garden from winds and prevents soil drifting. If the windbreak is summer-mulched with manure eight or nine inches deep and extending six to ten feet on either side the mulching will help with weed control.

In the experimental work at this

station these methods have proven efficacious and have been applied as well to the cultivation of small fruits with marked success.

(2) Wash the potatoes before treatment to remove dirt. (This is very important.)

(3) Have two clean cans with drain plugs at the bottom. When one soak is complete drain the solution into the second can and clean the seed out of the first. Use these cans alternately throughout the treatment.

(4) Dissolve all bi-chloride in boiling water.

(5) When 12 to 16 bushels of potatoes have been treated make up a new solution.

(6) Do not treat in bags.

(7) If possible use rain water, or water known to be soft.

(8) After treating put seed in clean place to dry quickly.

(9) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(10) Do not treat in bags.

(11) If possible use rain water, or water known to be soft.

(12) After treating put seed in clean place to dry quickly.

(13) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(14) Do not treat in bags.

(15) If possible use rain water, or water known to be soft.

(16) After treating put seed in clean place to dry quickly.

(17) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(18) Do not treat in bags.

(19) If possible use rain water, or water known to be soft.

(20) After treating put seed in clean place to dry quickly.

(21) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(22) Do not treat in bags.

(23) If possible use rain water, or water known to be soft.

(24) After treating put seed in clean place to dry quickly.

(25) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(26) Do not treat in bags.

(27) If possible use rain water, or water known to be soft.

(28) After treating put seed in clean place to dry quickly.

(29) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(30) Do not treat in bags.

(31) If possible use rain water, or water known to be soft.

(32) After treating put seed in clean place to dry quickly.

(33) If weather does not permit rapid drying wash the tubers off with water immediately after treatment.

(34) Do not treat in bags.

PUBLIC NOTICE

TOWN OF WAINWRIGHT

NOTICE OF PREPARATION OF ASSESSMENT ROLL FOR 1930

Notice is hereby given that the assessment roll of the Town of Wainwright for the year 1930 has been prepared and is now open for inspection at the office of the Secretary-Treasurer of the Town, from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday and on that day from ten o'clock in the forenoon until twelve o'clock noon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the Secretary-Treasurer of the town.

Dated this 31st day of March A.D. 1930.

H. Y. PAWLING

Secretary-Treasurer

23-4

TENDERS FOR COAL

SEALED TENDERS addressed to the Purchasing Agent, Department of Public Works, Ottawa, will be received at his office until 12 o'clock noon, Wednesday, April 23, 1930, for the supply of coal for the Dominion Buildings and Experimental Farms and Stations throughout the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from G. W. Dawson, Chief Purchasing Agent, Department of Public Works, Ottawa; H. E. MacIsaac, District Resident Architect, Winnipeg, Man.; G. J. Stephenson, District Resident Architect, Regina, Sask.; Chas. Sellens, District Resident Architect, Calgary, Alta.; and J. G. Brown, District Resident Architect, Victoria, B.C.

Tenders will not be considered unless made on the above mentioned forms.

The right to demand from the successful tenderer a deposit, not exceeding 10 per cent of the amount of the

It was moved by Coun. Robinson—That the report of the Finance Committee be accepted and that cheques be issued to cover the several accounts—Carried

It was moved by Coun. Robinson—That the account from Dunlop Rubber Co. for 100 feet of chemical hose, be not considered and that the hose be returned with the necessary explanation—Carried

A proposition from J. R. Cameron re: scavenging was laid before the Council.

It was moved by Coun. Petrie—That the letter from J. R. Cameron re: scavenging be laid over till the next regular meeting—Carried

At this juncture of the proceedings Coun. Huntingford presented to the Town of Wainwright, through the Council, a handwritten framed duplicate of the Letters of Incorporation of the Town of Wainwright, the previous one having been destroyed at the time the former municipal building was burned

It was moved by Coun. Petrie—That a vote of thanks be extended to Coun. Huntingford for the framed copy of Certificate of Incorporation, to replace original lost in the fire—Carried

It was moved by Coun. Clifton—That a fire siren be installed at as early a date as possible—Carried

It was moved by Coun. Clifton—COUNCIL—

That owners of buildings which do not comply with building by-law within fourteen days and that all curb gasoline pumps be removed prior to May 1st—Carried

A communication from Alex Swanson asking permission to remove shack on Lots 13 and 14, block 6, for a period of thirty days.

It was moved by Coun. Welch—That Alex Swanson be given permission to move building as outlined in his written application to Council—Carried

Application from Mrs. A. M. Howe for the purchase of lot 40, block 4, plan 6445V

It was moved by Coun. Welch—That Mrs. A. Rowe's application for purchase of lot 40, block 4, be accepted—Carried

It was moved by Coun. Welch—That Mrs. M. Christensen be appointed caretaker of Town hall at \$25.00 per month—Carried

It was moved by Coun. Petrie—That this meeting adjourn—Carried

KEEP SMILING

Though days be dark and trade be tough
It's always well to make a bluff
And face the world with cheerful eye
As though the goose were hanging

High,
No merchant ever made a friend,
By dire complaining without end;
And people never seek a store
To leave a grocer's merchant roar.
They'll patronize the wiser gent,
Who doesn't air his discontent.
—Walt Mason.

THE EXAMINER'S WEEKLY REVIEW OF PROV. MARKETS

CATTLE

BEEF—Choice heavy steers give \$0.75@13; cobbles light from \$10@10.50, good 9.75@11; medium from \$8.60 with the common down to \$7. Choice heifers from \$9.50@10; fair 8.25@8.75. Choice cows \$7.75@8 good from 7.50@7.75 medium 6.75@7.25 common \$6.50@6.75 and up. Choice bulls at 5.75@6 medium 5.50@5.25 and canners from 4.50 up. Choice hogs at 5.75@6; medium 5.50@5.25 and canners from 4.50 up. Good demand prevailing for calves with price steady at 11@12 for choice and common kinds \$6@8 FEEDER AND STOCKERS—Choice feeder steers 6.50@6.75 Choice stocker steer from \$6@7.50. Stock heifers from 5.50@6.50. Stock cows from 5@5.75

HOGS

Edmonton hogs made 11.00 for the bacon this week with select at 50c premium per cwt, on fed and watered head.

SHEEP

Buyers at Edmonton have adopted an indifferent attitude on the sheep market this week. Prices are easier with lambs from \$9@9.50; yearlings 7.50@8.50 and ewes from \$5@7

GRAIN

Reports of further liberal offering from Russia and France at Liverpool and little export business passing for Canadian wheat, caused the market at Winnipeg to react on Wednesday and prices as a result closed low.

Private estimates of American wheat averaged 374 million bushels. This week's prices are steady as follows: No. 1 cantons 40c; No. 2 cantons 38c; No. 1 prints 38c; No. 2 prints 37c; Slight surplus is noticeable in province. DAIRY BUTTER—This market is unchanged. Demand only and prices are unchanged. Supply showing reasonable increase.

POULTRY—EGGS

POULTRY—Crates arriving on market now contain very few really choice birds. Retail demand slow with storage stocks taking care of all trade being worked. EGGS—Demand only moderate. Eastern buyers apparently not interested. Lower prices may increase home consumption and take care of congestion. This week's quotations are as follows: Extras, 22c; firsts 20c and seconds 16c HAY—GREENFEED—OATS

PAPER CHANGES HANDS

The Fort Saskatchewan Record, conducted for several years by H. Cady, has been disposed of by L. L. G. Neale of Edmonton who is selling to a sporting chance with a difficult proposition. It is tough sledding to run a newspaper in any of the smaller towns and it is tough all the time. But un-

SAFEWAY STORES

WITHOUT public approval PROFIT cannot long be MAINTAINED

This thought was voiced by an officer of Safeway Stores before a recent meeting of all directing heads of the organization. It clearly expresses Safeway's long realization that, if we expect to continue to grow and prosper, we must, at all times, merit your hearty approval by making your every transaction with us, truly satisfactory to you.

der, Mr. Oxley's management, the Fort has had a newspaper sufficient for its needs and not patronized half as well as it should have been. Mr. Neale has our good wishes in his undertaking—EX.

BEAUTIFYING THE FARM HOME

(Experimental Farms Note)

Every unimproved or unplanted home in Canada can be made more attractive and more valuable by the planting of trees, shrubs, vines and flowers, and a well-kept lawn. The cost of the nursery stock required is one of the most profitable investments a farmer can possibly make, because such improvements will actually increase the money value of the place by many times the amount spent in a simple plan of home planting. It will make it more valuable as a home and it will certainly command a better price if put up for sale. It is surprising how a few improvements will turn a mere house into a real home. The value of the nursery stock required is one of the most profitable investments a farmer can possibly make, because such improvements will actually increase the money value of the place by many times the amount spent in a simple plan of home planting. It will make it more valuable as a home and it will certainly command a better price if put up for sale. It is surprising how a few improvements will turn a mere house into a real home. THE CHOICE OF A HOME

When the choice of a dwelling is to be made, we may be reminded that it is the people who live in it who will determine whether or not it is a true home. Accepting such a statement without discussion, we think it is also true that the type of dwelling will either hinder or help in the making of a home.

Development of body and mind requires certain physical conditions. Proper development demands fresh air, water, food, sleep, exercise and protection. It is a matter of common sense, then, to make these obtainable in the dwelling if the home is to give the children those surroundings favourable to healthy growth.

The best mother in the world cannot make fresh air and sunshine appear in a room without a window, any more than she can prepare a proper meal without some cooking facilities.

A baby may thrive the first year or two in a flat or apartment. After that he should be free to play in. He should have freedom and may be restrained within narrow bounds. When there are children the home should have a yard, at least, be near a park where the children may go regularly to play.

During the early years of life, it is much more important for the child that there be a place where he can play with other children than that the house have all the modern comforts and conveniences. In order to live we must have air.

If deprived of air for a few minutes, we cease to live. We require oxygen, the air in which we live has a tremendous influence upon us. It is a matter of common experience that in what we think of as a hot, close, atmosphere, we are dull and listless whereas in the fresh, cool air, we feel bright and active.

Everyone, including the children, should live in fresh, cool air. The best place to secure such air is out in the open. Children should spend a large part of their lives playing or sleeping out of doors. Indoors, we should keep the air of the home fresh by ventilation, using suitable doors and windows to keep the air cool and in gentle motion.

In choosing a home, bear in mind the need for playgrounds, and for windows to let in fresh air and sunshine.

YOUR HEART & INSURANCE

Weighing about five-eighths of a pound, and bulking about the size of the clenched fist, the heart is the central pump of the body, controlling the flow of its life stream. Beating at the normal rate of over seventy times a minute, the heart will pump five quarts of blood. Often it is beating faster and pumping twenty quarts a minute.

Isn't that a little thought and care to see that such a hard working engine is treated fairly?

One out of every three who are rejected for life insurance is refused because of a serious heart defect.

How is our heart? Many of the signs which you may think mean heart disease can be caused by some other disorder. Indigestion, lung trouble and nervousness may cause a pain near your heart, shortness of breath, fainting and irregularity of beat. If you suffer any of these, go at once to your doctor for an examination. He may tell you that you do not have heart trouble and will find out what is wrong.

If you do have something wrong with your heart, it is well to know it at an early stage when proper care may bring your heart back to health. In many cases heart trouble is curable. It has been said that the surest recipe for living to an old age is to find out that you have a disease and then take care of it. The wise habits of living that the early recognition of heart trouble brings are good for the entire body.

The main causes of organic heart disease are rheumatism, certain contagious diseases of childhood, diphtheria, scarlet fever, etc., syphilis and improper habits of living.

No one else can do as much for your heart as you can. Keep it healthy by going to your doctor for that annual health examination by looking after infected tonsils or teeth by eating the right foods by taking the proper amount of exercise, by keeping weight normal or by using tobacco or stimulants.

Health Literature may be obtained from the Red Cross Society 407 Civic Block, Edmonton, Alta.

Now Ready For Research

"I believe we are just on the threshold of a considerable development in the field of agricultural economics research," observes Dr. J. F. Booth, Commissioner, Agricultural Economics Branch, Dominion Department of Agriculture. "I think as time goes on both farmers and the general public will appreciate and value all economic research in the solution of agricultural problems." Coming, as this does, from Dr. Booth it has particular significance. On two occasions recently, the annual meeting of the Canadian Horticultural Council and the All-Canada Agricultural Conference, keen demands for economic surveys and cost production studies were evinced. Not only does such work reveal relative profitability of farming; it also provides a medium for finding and correcting local difficulties in existing methods.

What Shall We Name The Baby?

A SYMPOSIUM BY INTERESTING PEOPLE OF TODAY
CONDUCTED BY WILLIAM A. LEWIN

To select a suitable name for each new baby that comes into the world is indeed an absorbing problem. Nearly 2,000,000 new babies were born last year, and yet there have been less than 1,000 names to choose from. Parents search today long and hard for suggestions. Shall we create some interesting new names?

No. 4—OCEIL B. deMILLE
MOTION PICTURE PRODUCER

A liking or a dislike for any special name is so swayed by the environment and circumstances of the moment that I have set myself no definite standards in this matter. I have no favorite names but I consider it a great shame that we have such a small selection. We definitely need additions to the field now largely restricted to Helen, John, William, Mary, and Phillip.

I am serious when I say I never have been able to understand why the most beautiful names we have are wasted on diseases.

For instance, Malaria is very beautiful. Typhus is a fine name for a boy and Diphtheria for a girl. These may seem strange when unfamiliar but this fact is seen in the profession of names they select—Leatrice Joy, Louise, Evelyn, Bonnie Love, etc.

Obviously, it is difficult to apply a name to denote a personality for a three-day-old infant, and for this reason, I firmly believe that parents should never hesitate to rename a child when it is seen that the personality is going to be entirely foreign to the meaning one associates with a particular name. You must have checked at the name Percy connected with your elephantine wash woman, or at some modern live by flapper bearing the appellation of Prudence. Percy, Archibald, Freddie and such names are certainly not intended for big raw-boned lumberjacks.

Names that are either favorites of yours, or odious to you, are such because of their association with personalities of your acquaintance. Others are so common that they have no special significance. In naming characters in a picture, this latter class is one most frequently called upon in order to avoid a subconscious dislike for a character, merely because the name has a negative significance for the theater-goer. I like names as they go with the surname—in other words those that make an euphonious whole plus a logical and attractive significance. I like many names when properly applied. But asking a person what name he favors is like asking a doctor if he believes in an operation. The only answer is "What for?"

AARON is a name of Hebrew origin meaning "mountain." It is the name of a character in the Bible noted for his command of speech.

ABIGAIL is a name of Hebrew origin meaning "a father's joy." It is a general name used by Eighteenth Century novelists for a lady's maid. In the Old Testament Abigail waited on David.

and one hard-boiled egg. Use the heart of the lettuce for the body of the salad. Shred the lettuce, chop the onions and mash the egg. Moisten with French dressing and pour over the lettuce.

Spanish Delight

Two lettuce hearts cut in quarters two ripe tomatoes peeled and quartered, one cucumber cut in dice, one sweet Spanish pepper, shredded, two sprigs of parsley cut fine, two hard-boiled eggs sliced, salt and pepper to taste. Arrange ingredients on lettuce and cover with French dressing.

"CHALLENGE" LEMON PIE

Here's another lemon pie, which is simply delicious, but needs little unusual care and attention. It challenges your ability so we call it "challenge" pie. Beat yolks of 3 eggs until very light. To this add juice of one lemon and rind of 2 lemons, 3 tablespoons hot water, ½ cup of sugar and a large pinch of salt. Cook in double boiler until thick. Wash whites of eggs beaten stiffly, add ½ cup of sugar to them and fold into cooked mixture. Fill pie shell that has been previously baked, place in oven and brown.

SLICED ORANGES CANADIANE

Individual Service
From the chef of a famous French Canadian hotel comes this suggestion for varying the customary sliced orange service.

1 orange sliced
2 tablespoons maple syrup
Place sliced orange in a glass sherbet dish and cover with maple syrup. Ingredients should be very cold. Strained honey may be used in place of maple syrup if desired.

SAUTED HAM WITH MUSHROOM

4 pieces cooked ham
12 mushrooms
4 slices toast
Saute ham in butter until baked through. Saute peeled mushrooms. Serve ham on toasted bread with mushrooms overlapping on top.

CELERY TOP GREENS

Wash leaves carefully and cut them from the very small green stems. The very green stems if cut very fine may be added to the leaves. Drop leaves and stems in boiling water for ten minutes, drain, rinse with cold water and put them on to cook in a small amount of warm water. Turn fire low until as soon as the water boils and gently cook until the stem and leaves are tender. Thicken the liquid with flour and add a generous amount of butter. Season with salt and pepper and a dash of paprika.

REFRESHING EATS FOR THIS WEEK

(BY BETTY BARCLAY)

FRESHENING VEGETABLES

Science has at last brought to the housewife a method for reviving depressed-looking vegetables, partially wilted by their long stay at a store counter. Wilted vegetables now can be restored, fresh ones kept in prime condition for many days, and sandwiches held fresh and wholesome for long periods of time in a recently perfected moist air compartment for the electric refrigerator, according to recent announcement.

The reviving powers of the hydra-tor are indicated by trails which show that celery has been preserved crisp in perfect condition for periods extending over six weeks. Similar stories can be told about carrots, parsley, lettuce, green beans and green vegetables of almost every sort.

MINERAL DELIGHTS

With the coming of spring we need plenty of minerals, salts and vitamins. Lettuce and other green vegetables fit into these needs without drawing very heavily upon the family pocket book. Here are two salads, particularly seasonal during April and May.

A Man's Salad

One head of lettuce, half a dozen young green onions, including tops,

Many Improvements in New Ford Truck

Showing Housing for Three-quarters Floating Rear Axle and Dual Wheels of New Ford Truck.

AUTOMOBILE shows in Montreal, Ottawa, Quebec and Vancouver this year have witnessed universally an increased interest in the commercial exhibits. Visitors appear to have become more alert to the possibilities for greater utilization of motor transportation in business and agricultural activities.

In each city, attention has centered about the improved Model AA one-and-one-half ton Ford truck chassis.

Improvements in the Ford truck include, among others, the new four-speed transmission, the spiral bevel gear rear axle which is of the three-quarters floating type, larger and stronger front axle and springs, the torque tube drive and larger brake drums. The entire chassis also has been strengthened.

The four-speed transmission gives drivers of the Ford truck ample road speed for rapid, efficient transportation, together with an improved low-speed pulling power sufficient for moving capacity loads out of pits or on soft ground.

The new transmission is of the standard, selective sliding-gear type, providing four speeds forward and one reverse. Ball and roller bearings on both shafts reduce wear and friction and add greatly to the life of the transmission.

There is a large size outlet on the right side of the transmission case for power take-off.

The new rear axle is of improved

construction and has a spiral bevel gear. It is of Ford truck design with straddle-mounted pinion. Entire weight of truck and load is carried on the housing. This means that axle shafts serve only to turn the rear wheels.

The new front axle is nearly twice as strong as formerly. The front spring is heavier with wider leaves. The centre cross member of the frame, which takes the driving thrust transmitted from the rear wheels, also has been made stronger.

Another major change is to be found in improved braking power. Brakes are larger, the braking surface having been increased to 474 square inches. All brakes are fully enclosed.

An improvement that will prove of considerable economy and convenience to the truck driver is the dual rear wheel feature, designed to make the steel disc wheels interchangeable.

The principle of the famous torque tube drive used on the Ford chassis is that all strains and drive are taken up by the tube that surrounds the driving shaft.

Chassis dimensions are over-all width across rear hubs, 60 1/2 inches; over-all width across dual wheel tires, 74 1/2 inches and over-all length, 183 1/2 inches. The wheel base measures 131 1/2 inches. The turning circle of the truck is 46 feet. Fuel tank has a capacity of eight imperial gallons.

Chestnuts & Geography

BY MABEL BOWLER

Vera Carey looked up at the clock beside her mother hurriedly, watching up her school bag and hurried out into the cold February morning. She ran until she reached the cottage where her friend Edna Dale lived.

"I hope she's ready," she reflected anxiously. And entering without knocking, exclaimed in concern: "What another cold! I thought as much. Oh you poor kid!"

Edna, a frail nine year old girl sat before the fire in the armchair. Wrapped in her grandmother's flannel gown she looked up at Vera with a grateful smile.

"I didn't want to miss school," she explained. "But mother says I can't go again until they get a new stove."

"Yes," Vera sympathized "that old thing's a disgrace. But I just hate lunch hour without you. Anyway I must go now or I'll be late from being to bring Edna's books home."

That afternoon she ran all the remaining seven blocks to school to make up for lost time.

"It isn't right," she reflected on the way that Edna should have to miss school on account of that old stove. I'm going right to Mr. Evans and tell him just what I think. If he can't make the selectmen do something about it, then I will. I suppose they think that anything is good enough for a country school."

She was just in time and with the air of importance took her place at her desk. Mr. Evans was the teacher, and when at noon Vera looked his cause he listened sympathetically. He liked Vera for while she was mischievous and quick tempered she was above the average in intelligence. More over she always told the truth.

But Mr. Evans shook his head. "I'm sorry Vera," he said with an expression of helplessness but I've done all I can. The selectmen refuse to believe that your children are suffering. I know that it is a disgrace to the district to have such a condition in our school. However I'm afraid we must make the best of it until next fall anyway. That's all we can do.

Vera had no excuse for detaining Mr. Evans any longer but she was by no means satisfied. She sat round the hopeless stove to eat her lunch with the rest of the children who lived at a distance, quiet for once. For her mind was fixed on ways and means of bringing the selectmen to reason. (The boys poked fun at her red hair and freckled face as usual. But she was more than a match for most of them and her quick retorts soon silenced them.)

There was a fighting light in her eyes when she took her place that afternoon. And when Mr. Evans said that the selectmen would visit the school the following day determined to be ready for them. For she noticed that even then the little ones were clutching themselves and stamping their feet in their efforts to keep warm.

"Silence!" Mr. Evans demanded from his desk and momentarily the little feet stopped stamping.

"I want you all to do your homework with speed and thought," he began. "I am looking to you to do me credit. The junior grades will give their recitations. The senior grades will learn the principal products of Canada and the United States."

The children whispered together more or less audibly but it was evident that they were far more interested in trying to keep warm.

The selectmen are coming tomorrow Vera announced to her mother when she got home. "Won't we have some fun! Most of the kids will probably be away sick with colds any way. Mr. Evans will say it's because of the old stove and they'll be forced to do something about it. It was freezing again today! The fire would not draw and the smoke blinded us."

"No Vera Mrs. Carey reproved. "I can't have you speaking disrespectfully of the selectmen it isn't your place to call them to account."

"But it's a shame that it is. Edna was away again today. I've taken her books home until the stove's fixed."

"They should see to it certainly," Mrs. Carey agreed and I'm sure they will. If you want to go over to Edna's after supper you'd better stop talking and get well wrapped up. For a few minutes Vera concentrated on her geography. Then she asked: "They make stove, furnaces and things like that in Canada don't they mother?"

"Surely they do child. You ought to know that!"

"And paint, varnish and calcimine. Of course they do! Some people seem to think we grow wheat in Canada and that's all. Why we manufacture almost everything down East."

"All right," Vera reflected as she put away her book. A hint or two won't do any harm anyway."

Vera thought deeply all the way to Edna's and back and after she went to bed. She wasn't looking for disgrace but she was a warm-hearted child and she didn't like to see her companions especially Edna suffer unnecessarily. She had warm clothing and was strong but some of them

were not so fortunate. 'Selectmen in deed' she yawned at length. Then she fell asleep.

On waking next morning the first thing she saw was a sitting of chest nuts hanging on a wall on the wall. She used to play with them when she was a very little girl. She took it with her downstairs and with a vague plan of action in her head she put it in the bottom of her lunch basket and took it with her to school.

With their usual dignity the selectmen arrived just before the afternoon session began. They were seated in chairs placed to the right of the platform on which Mr. Evans had his desk. The stove was also on that side of the room and much to the disgust of both teacher and pupils it happened to be drawing particularly well. The selectmen evidently quite comfortable looked about them with an air of satisfaction while they waited for the session to begin.

First the juniors gave their recitations and while this was in progress Vera's brain worked quickly. By the time Mr. Evans called upon her to name the principal products of Canada she had not only worked out a plan but had started to put it into action.

"Grain," she replied. She was beginning to feel nervous.

"That's right," Mr. Evans returned sharply "but what else? As a rule Vera was one of his brightest pupils and he depended on her to do him credit."

But a sudden fear of what she had done seemed to paralyze her throat. Unable to speak she stared vacantly at the ceiling and round the room until at length meeting Mr. Evans reproving eyes she stammered: "Stoves, stove pipes and furnaces!"

Mr. Evans glared at her. "You may sit down," he said.

"Oh and paint, varnish and calcimine she added gaining confidence.

"You may get down," Mr. Evans roared. He was quite angry.

The selectmen looked at each other significantly during this performance and some of the older children giggled.

Mr. Shell one of the former got up. "Well," he said turning to his companion "everlasting appears to be O.K. Nothing pressing Mr. Evans?"

"Nothing but the stove sir," Mr. Evans returned. "A dozen or so of the children are absent today with bad colds. The attendance has been very poor all through the winter. Some of the parents have refused to allow their children to come again until a new stove has been installed."

"Good for you!" Vera reflected listening intently from her seat under the duster.

"It appears to be throwing out a good heat now," Mr. Pratt another of the selectmen remarked. "Children can't study in a house! Worst thing in the world to teach them and then send them out in the cold! They should think themselves—"

At this point a slight explosion checked the selectmen's remarks and all eyes were turned on the stove. The next moment another explosion more violent, lifted the stove momentarily off its brick corner stone and flung the cracked door at Mr. Pratt's feet.

Mingled exclamations of awe and glee escaped the children. Mr. Evans looked suspiciously at Vera. The selectmen got together and discussed the stove in a corner.

Dismissed half an hour earlier than usual the children hurried home with the startling news that the stove had burst up for the benefit of the selectmen.

On her way Vera called to tell Edna and her mother.

"How did it happen?" asked the latter.

"Don't you tell! Promise?" Vera begged mysteriously.

Vera Whatever mischief have you been up to now! Mrs. Dale demanded.

"Well Vera confessed, "I just slipped some chestnuts into the damper while the stove was on. The first didn't do the trick so I put in some more. Oh I'm glad I thought of the chestnuts. You should have seen the selectmen's faces when the door flew off! There'll be a new stove put in by Monday you see if there isn't! Then Edna can come back to school can't she Mrs. Dale?"

"Surely. Although I don't think you should have done such a thing. Any way since no one is hurt it is perhaps a good thing."

Mrs. Carey however was angry with Vera. Suppose the stove had hit some body! she exclaimed. "You'll get your

"GUTTA PERCHA" GUM CUSHIONED

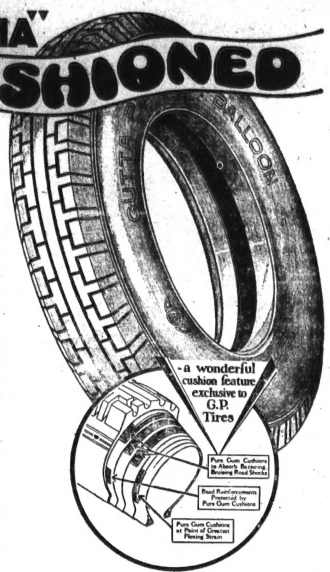

Doubly fortified against wear

After building a tire with Gum Cushions...the greatest inner safeguard a cord tire ever had, we added the further protection of our new tough "Resisto" tread. This new tread gives 47 1/2% more wear resistance to the tire, a fact proven by actual scientific test... a test equal in severity to thousands of miles of road service... We claim for the "GP" Gum Cushioned Tire that it will outwear any other tire sold at an equal price in Canada.

soft into trouble one of these days in interfering with what isn't your business.

"I never thought of the door hurting anyone, but you see mother it didn't—and—"

Just then Mr. Evans stood in the doorway. "So you thought desperate wrongs required desperate remedies did you Vera? Oh yes I know you did! He threw some horse-chestnuts on to the table. His voice was harsh but there was a twinkle in his eye. But Vera didn't see it. She was afraid."

"I told you so!" Mrs. Carey exclaimed. "I've just been scolding her. Mr. Evans she continued."

"No need to do that. Mrs. Carey certainly the means were rather desperate but since no one was hurt and they produced the desired effect it is all right. Indeed I question if any thing else would have been so effective. Selectmen need lessons sometimes!"

In fact she has done me a personal favor and I am sure the children will be equally grateful. We're going to have a new stove right away and in the holidays the building is to be redecorated inside and out! Vera's fears had given place to smiles. "It must have been the geography that did that!" she exclaimed. "Chestnuts and geography!"

A COLUMN OF WIT & HUMOR

Appeal For Justice
Mother—"Come Freddie, and kiss your aunt Martha."

Freddie—"Why, Ma, I ain't done nothing."—Stray Stories.

Literary Bunions
"There's a lot of same verse in this book."

"Well, what do you expect in lamp fodder?"—Brooklyn Eagle.

Alibi Ike
Old Lady—"If you really want work—Farmer Gray wants a right-hand man."

"Just my luck, lady—I'm left-and-ed!"—Passing Show.

All Explained
New Ice-man—"Say, what do you think? The guy in that house threw me out because I tried to kiss the cook this morning."

Milkman—"I think the lady of that house does her own cooking."—New Goblin.

Golf Widow's Consoler
"My husband is away so much of the time I want a parrot for company. Does this one use rough language?"

"Lady, with this bird in the house you will never miss your husband."—Capper's Weekly.

Amateur Lawyer
Penitent—"I have stolen a fat goose from a poultry yard."

Priest—"That is very wrong." Penitent—"Would you like me to accept it, father?" Priest—"Certainly I will not receive stolen goods, return it to the man from whom you stole it."

Penitent—"But I have offered it to him and he won't have it."

Priest—"In that case you may keep it yourself."

Penitent—"Thank you, father." The priest arrived home to find one of his own geese stolen.—Hummel (Hamburg).

Virtue At A Discount
Agent (to new rich client, engaging talent for her "At Home").

What about Madame D'Oprano?" Client—"Is she good?" Agent—"Good? Why, she's a great

virtuous."

Client—"Never mind about her morals. Can she sing?"—Humorous.

His Eyes Were Bigger Than It
"How did you like the party, Jack?" "Awful. You said I could eat as much as I liked, and I couldn't."—Beun Humor (Madrid).

THE STAR HAS LEARNED THAT --

BORN—To Mr and Mrs F. Thurston
at Wainwright municipal hospital
on April 1st, a boy.

BORN—To Mr and Mrs H. Coffold,
at the Wainwright municipal hos-
pital on April 5th, a boy.

Mr Wm McNeen having now great-
ly recovered from his illness has re-
turned home from the hospital after
a very long stay there.

One of the oldest men in the British
Empire, Mr James Hendley, a French
Canadian, passed away last week in
Peterborough, Ont., at the age of 109
years.

A quiet little wedding took place
at the United church mause on Wed-
nesday last, when the pastor Rev N
Whitmore united in marriage Miss
Nellie M. Spady, of Wainwright and
Mr J. Sager, of Edmonton. The
happy couple were supported by Miss
N. Ogilvie and Mr P. Spady.

Mr Jack Forsyth, of Jasper spent
a couple of days in town at the week
end on business.

Mr P. E. Wiley was a tripper to
the city on business over the week
end.

Practically in each corner of the
district, our farmers are now on the
land preparing the seed bed for the
1930 crop.

Mr W. Bruner left on Sunday to
drive to Calgary on business.

Mr Walter Adams, of Fabyan, was
taken to the hospital on Monday last
for treatment, and we wish him bet-
ter.

The G.W.G. Co., of Edmonton are
offering big cash prizes for con-
tainers according to an advt. in another
column of this issue.

Mr Frank Betts of the Bank of
Montreal staff at Westlock is here on
a three weeks visit with his mother.

Miss Dorothy Hetherington, of Aub-
urndale, who previous to entering the
agricultural college at Vermilion was
a pupil at Wainwright high school
was the winner of the scholarship
presented to that institution by the
Alberta Women's Institutes. The pre-
sentation was made at Vermilion last
Wednesday at the closing exercises.

The Fabyan Pete Co are sporting a
brand new Chev. truck this week
which Mr R. E. Williams purchased
from the Forster & Bruner garage
last Saturday.

The big annual manufacturers
sale of Satin-Glo will be on next week
at the Atlas Lumber Yard. This is
a genuine saving of 33 1/3% if you
do not have time to use the paint
now it will pay you to buy it and use
it when you are ready. All the latest
colours.

The school musical festival has
been honored by the presentation of
two more splendid cups for competi-
tion on May 23rd next. These have
been presented by the Hardisty
school board and the Wainwright W.I.
and those responsible for the festival
are grateful for those splendid tokens
of co-operation in their work.

Mr Wm Crowe is now driving his
new Marquette sedan from the
Lupre garage.

Mr Lorne Mitchell is now the proud
possessor of a dandy new Chev coupe
which he purchased this week from
the local agents.

Mr Leonard Hyde who has been
visiting his mother Mrs Wm. Crowe
is leaving this week for his home in
Vancouver.

Next Sunday, being the Sunday be-
fore Easter Day, will be Palm Sun-
day.

Our big town memorial clock is
once again ticking off the hours in
splendid shape, with the master clock
gracing the walls of the Council
chamber of the town hall. Official
timekeeper Cork has sure made an
splendid job of this timepiece and its
four big faces at work are a welcome
sight again.

Don't forget the big Satin-Glo
sale which starts at the Atlas yard
on April 12th. Gallons reduced from
\$6.00 to \$4.00. All other sizes accord-
ingly. Bring in your coupons and save
money on paint.

Mr J. R. Love addressed a well at-
tended meeting at the Greenfields
hall on Monday, when he gave a
short resume of the session of the
provincial parliament juq prorogued.

On Saturday next the monthly
meeting of the W.I. is being held in
the I.O.O.F. Hall, and all ladies inter-
ested are invited to attend.

The dance which the local veter-
ans are staging next Friday evening
in honor of Vimy Day promises to be
the best of the season. Get your tick-
ets early for this.

Place your order with us for an
Easter Lily—Standard Pharmacy

Mr J. Laird was a tripper to town
from his home at Chauvin on Sunday.

Bill Stuart will be selling the Gor-
don effects on Saturday next at the
residence on Fifth avenue west.

A sale of home cooking, etc., and
afternoon tea is being held in the I.
O.O.F. hall on Saturday, April 12th
for which the ladies of the C.W.I.
will be responsible. Save the date.

Mr R. G. Dunsmore has been ap-
pointed district agent for the Alberta
Seed Growers' association under the
department of agriculture. Farmers
requiring registered seed, grain
should obtain prices and place their
orders with "Bob" at the Alberta
Pacific elevator. Phone him at No. 8.

Mr and Mrs G. L. Hudson left last
week end.

Owing to an oversight, the name of
Mr and Mrs. Jones was accident-
ally omitted from the list of donors
of floral tributes at the Turnbull fun-
eral. They sent a lovely spray.

Get a pair of Dust Goggles for
35c at the Standard Pharmacy

Something which parents and town
smen alike can well check up is the
way in which some of the school boys
are using their sling-shots to the de-
triment of the street lighting service.
In many instances this is the cause
of the lamps being "out" at night and
a phone to 45 or 95 will get this recti-
fied. The use of sling-shots and the
breaking of street lights is a serious
offence; possibly a word in serious
words will prove sufficient.

Mrs P. Richmond and her young son
Clayton are guests at the home of
Mrs W. Hunsford for a short hol-
iday from their home in the city.

Mr L. H. Melvillejohn, who is con-
tacted with the Edalta Co., is now
back from the east.

Mr A. Simmenman is improving
his property holdings on Fifth avenue
east by the addition of a new fence
around it.

Mr Dave Dundas has purchased
the house formerly occupied by Mrs
Gordon on Fifth Avenue west and
will be moving his family there early
in May.

Dr Middlemas and wife left last
week for Vancouver where they will
remain for a short time.

Mrs Fred Gordon and family expect
to leave for British Columbia next
Saturday night.

Mr D. W. Beaubier, well known oil
man, was in town on Sunday and ex-
pects to return here in a short time
as soon as arrangements can be made
to start operations.

Enjoy a light lunch or an ice-
cream at the Standard Pharmacy.

Electrical Engineers Ltd., of Ed-
monton with Mr Coe in charge are
now installing another large unit at
the Calgary Power Plant.

The young daughter of Mr Jerome
Bianella was taken suddenly ill last
week with pneumonia and is a pa-
tient at the hospital.

Mrs Steve Thompson of Pauschen-
dale who has been in Edmonton hos-
pital for some time has returned
much improved in health.
